SUMMARY

Backend-focused Software Engineer with 2 year of experience in building scalable ERP systems using Java, Spring Boot, Spring MVC, and RESTful Web Services.
Experienced in building scalable backend systems, secure API design, and delivering high-performance backend solutions.

EXPERIENCE

Associate Software Engineer (Backend – Java / Spring) <i>ERP Daddy Software</i> - Developed and maintained ERP modules including Sales, Purchase, Inventory, Finance, and CRM using Java, Spring MVC, Spring Boot, JSP, and RESTful APIs. - Designed and enhanced backend services for order processing, inventory tracking, customer management, and financial workflows, ensuring reliable business operations. - Built and optimized REST APIs for seamless integration between ERP modules and third-party systems, improving application performance and maintainability. - Developed and customized Jasper Reports, including invoices, ledgers, purchase orders, sales reports, and MIS reports for business users. - Participated in requirement analysis, feature development, bug fixing, and production support for live ERP products including FMS, HMS, and CRM. - Collaborated with cross-functional teams to deliver new features, resolve production issues, and ensure system stability in a multi-user enterprise environment.	Jan 2025 - Present Agra, Uttar Pradesh
Software Engineer Trainee (Java Backend) <i>ERP Daddy Software</i> - Engineered and maintained Java-based ERP applications using the Spring Framework, improving backend performance by ~18%. - Streamlined SQL queries and database interactions in MySQL and SQL Server, ensuring data integrity and reduced query latency. - Integrated backend REST APIs with frontend components using HTML, CSS, and JavaScript, improving UI responsiveness and reducing integration issues by ~25%. - Participated in code reviews, debugging, and testing, contributing to faster release cycles and reduced production defects.	Jul 2024 - Dec 2024 Agra, Uttar Pradesh

PROJECTS

Billing and Accounting Software Spring MVC, Spring Security (JWT), Spring Data JPA, JSP,MS SQL Server, SVN - Designed an end-to-end billing and accounting system to manage sales, purchases, inventory, and financial records. - Architected core financial modules including Payment Vouchers, Sales Vouchers, and Opening Stock to ensure accurate stock and transaction tracking. - Structured master modules for Accounts, Groups, Units, and Items with consistent validation and data integrity. - Implemented a client-side Excel import feature using JavaScript to dynamically read headers, validate row data, and upload bulk master entries into the database.. - Applied role-based authentication and authorization using Spring Security (JWT) to protect financial operations.
Furniture Management ERP(FMS) Servlets & JSP, JDBC, MS SQL Server, SVN, XML, JavaScript, JSON, HTML/CSS, Google Sheets API - Enhanced a Furniture ERP system by improving web and mobile functionalities across multiple business modules. - Built backend APIs using Java Servlets to enable seamless Android mobile application integration. - Architected and created JSP-based pages with custom business logic to meet functional requirements. - Developed a client-side Excel import feature using JavaScript to dynamically read headers, validate row data, and upload bulk master entries into the database. - Automated data export to Google Sheets using Google Sheets API for one-click external viewing and reporting. - Integrated Tally software using XML to export ERP data (Ledgers, Sales, Purchases, Credit/Debit Notes, Items, Units, and other masters) in a Tally-compatible format and built supporting APIs for the ERP mobile application.
Suvarnam ERP (Jewellery Business) Spring MVC, Spring Data JPA, Spring Security(JWT), JSP, MySQL, SVN, HDFC Payment Gateway - Developed backend Modules using Spring MVC to support a mobile application for scheme purchases, EMI payments, and customer profile and report management. - Integrated HDFC Payment Gateway to enable secure and seamless EMI transactions through the mobile platform. - Implemented backend business logic for scheme purchases, customer profiles, and EMI-related financial reports.
Uniq Grow (Enterprise Business Management) Spring Boot, Spring Data JPA, Spring Security (JWT), MS SQL Server, SVN, Swagger - Architected and designed RESTful APIs for managing companies, users, buyers, products, catalogs, quotations, costing with variants, and master data including color, finish, category, product type, component, collection, and material. - Built an image processing service to generate, store, and manage product images in multiple formats (thumbnail, small, medium, large) for optimized performance across frontend modules.

TECHNICAL SKILLS

Languages: Java (JSE 8), JavaScript, XML, JSON
Backend & Frameworks: Spring Boot, Spring MVC, Spring Security (JWT), Spring Data JPA, Hibernate, Servlets & JSP
Architecture: Microservices, RESTful API Design
Dev Tools: Eclipse, STS, NetBeans, Visual Studio Code, Postman, SVN, Swagger, Docker, Jira
Databases: Microsoft SQL Server, MySQL
Reporting Tools: Jasper Reports (Dynamic Reports, Sub-reports, Invoice & Ledger Reports)

EDUCATION

Faculty of Engg And Technology Agra College Bachelor's Degree in Computer Science and Engineering	Agra, Uttar Pradesh Jul 2021 - Jul 2025
