## CAREER OBJECTIVE

AS a passionate recent MCA post graduate student with strong foundation in artificial intelligence and machine learning. I have hands on experience in building and deploying ML modules using python ,scikit-learn and Tensor flow. I am eager to apply my skills in AI-ML to contribute to innovative ,data -driven solution in a dynamictech enviroment and real -world challenge.

## EDUCATION

### Greater Noida Institute of Technology (GNIOT)

2024-2026

- Master of Computer Application (pursuing)

### Babasaheb Bhimrao Ambedkar University, Muzaffarpur

2021-2024

- Bachelor of Computer Application  
Percentage - 74 %

### BSEB PATNA, BIHAR

2019-2021

- INTERMEDIATE (12TH)  
Percentage – 62%

### BSEB PATNA, BIHAR

2019

- HIGH SCHOOL (10<sup>TH</sup>)  
  
Percentage – 80%

## SKILLS

- **Programming language-** C, C++, Python
- **Machine learning:** Experience with linear regression, random forest classifier, and data preprocessing, model evaluation.
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn

- **Basic concept** - Object-Oriented Programming (OOPs), DBMS
  - **Database** – MySQL, SQL
  - **Tools** - VS Code, Dev-C++, IntelliJ IDEA, Jupyter Not
- 

## PROJECTS

### 1. Forestfires Prediction

- **Technology Used:** Python, pandas, Scikit-learn, Matplotlib
- **Description:** Developed a machine learning model to predict the occurrence of forest fires based on environmental and meteorological factors such as temperature, humidity, wind speed, and rainfall.
- **Role:** Handles data cleaning, EDA, feature engineering, model training, and performance evaluation.
- **Outcome:** To predict forest fire occurrence and burnt area using linear regression model based on environmental factors.

### 2. Social Media Analysis

- **Technology Used:** Python, Pandas, NumPy, Scikit-learn
- **Description:** Developed a machine learning model by performing data cleaning, EDA, feature engineering, and model training.
- **Role:** Managed the complete end-to-end development of the model.
- **Outcome:** Achieved good accuracy and extracted useful insights from the data.

### 3. Loan\_data set

- **Technologies Used:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Jupyter Notebook
- **Description:** Developed a machine learning model to analyze loan data and predict loan approval using various classification algorithms.
- **Role:** Handled data cleaning, feature engineering, model building, evaluation, and visualization.
- **Outcome:** Created a reliable prediction system that helps identify eligible loan applicants using accuracy, MSE, and  $R^2$  metrics.

---

## CERTIFICATION

- |                                              |                        |
|----------------------------------------------|------------------------|
| • Machine Learning With Python – Be by Tech  | 18-02-2025 • C – Udemy |
| 02-08-2025                                   |                        |
| • C++ -Infosys Springboard                   | 15-06-2025             |
| • Python - Infosys Springboard               | 09-04-2025             |
